  - APPENDIX 5 REGULATORY RECORDS DOCUMENTATION
  - APPENDIX 6 INTERVIEW DOCUMENTATION
  - APPENDIX 7 SPECIAL CONDITIONS
  - APPENDIX 8 STATEMENT OF QUALIFICATIONS: JONATHON BRACKETT

For this assessment Brackett Geosciences (BG) reviewed relevant Federal, State and local environmental files, conducted a site reconnaissance, and interviewed people knowledgeable of the site.

The Subject Site consists of one parcel that is 15828 square feet in size consisting of an undeveloped wooded area.

The available evidence suggests that the property has been wooded land for at least the last 100 years.

In reviewing Local, State and Federal environmental files for the site, BG found no records that suggested that there were any current, historical or de minimis recognized environmental conditions at the 46 Harry Kemp way, Provincetown, MA site.

During the site visit, BG observed the exterior areas of the subject site. Four traverses of the subject site were conducted. No evidence of prior development was observed anywhere on the subject site and no evidence of dumping of waste was observed anywhere on the site.

There were no interior observations made during this assessment as no structures exist at the subject site.

Based on the file reviews, site reconnaissance, and interviews, it is the opinion of BG that there was no evidence of existing, historical or de minimis recognized environmental conditions at the 46 Harry Kemp Way, Provincetown, MA suite.

#### 2.0 INTRODUCTION

#### 2.1 Purpose

The purpose of this Phase I Environmental Site Assessment was to identify, to the extent feasible pursuant to the processes prescribed in ASTM Standard 1527-13 and ASTM Standard E-2247-08, recognized environmental conditions in connection with the subject property and to conduct the due diligence required to qualify for Landowner Liability Protections from CERCLA liability.

As stated in paragraph 4.5.1 of the Standard "no environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions at a property. Performance of this practice is intended to reduce, but not to eliminate uncertainty, regarding the potential for recognized environmental conditions at a property".

## 2.2 Scope of Services

The scope of this assessment included a review of relevant Federal, State and local environmental files, interviews with people knowledgeable of the site, a reconnaissance of the site, and the preparation of this Phase I Environmental Site Assessment Report.

#### 2.3 Significant Assumptions

In the course of conducting environmental assessments BG regularly depends on the information in reviewed files or in interviews to be accurate. Outside of the assumptions of this nature that are commonly made in performing Phase I Environmental Assessments no significant assumptions were made during this assessment.

## 2.4 Limitations and Exceptions

Weather Conditions: The weather on the date of the site reconnaissance was overcast with a temperature of approximately 26 degrees F. BG believes that weather conditions did not affect our ability to conduct the work required.

Certain agencies recommended as local sources of information in the ASTM Standard do not exist in the State of Massachusetts (i.e. local water resources authority).

## 2.5 Special Terms and Conditions

No Special Terms or Conditions applied to this assessment.

#### 2.6 User Reliance

Only the Provincetown Housing Authority may rely on the background research, conclusions and recommendations presented in this report.

## 3.0 SITE DESCRIPTION

#### 3.1 Location and Legal Description

The subject site is located on the north side of Harry Kemp Way in the northeastern part of Provincetown, MA.

According to the assessors cards the property is owned by the Caro Hawthorne and is also known in the Provincetown Assessor's Office as Map 13-1-25-J.

## 3.2 Site and Vicinity General Characteristics

The subject site is located in an area of Provincetown that is predominantly in residential uses, with scattered, light commercial uses. Provincetown is located at the eastern end of Cape Cod. The developed portion of Town is located on the southern side of the Cape while the northern portion is primarily sand dunes and native vegetation.

## 3.3 Current Use of the Property

The subject site is currently undeveloped, wooded land.

## 3.4 Descriptions of Structures, Roads or Other Improvements on the Site

BG did not observe any structures, roads or improvements on the site.

#### 3.5 Current Uses of Adjoining Properties

The subject site is abutted on to the north by Conservation Land, to the west by the Provincetown Housing Authority, to the east by residential development, and to the south by Outer Cape Health Services.

#### 4.0 USER PROVIDED INFORMATION

- **4.1 Title Records** It is BG's understanding that the title review will be conducted by another entity.
- **4.2 Environmental Liens** The user is not aware of any environmental liens filed against the subject property.
- **4.3 Specialized Knowledge** The user does not have specialized knowledge or experience that is material to recognized environmental conditions in connection with the subject site.

- **4.4 Commonly Known or Reasonably Ascertainable Information** The user is not aware of any commonly known or reasonably ascertainable information within the local community about the property that is material to recognized environmental conditions.
- **4.5 Valuation Reduction for Environmental Issues** It is BG's understanding that the valuation for the site has been set by an independent appraiser and that the valuation has not been reduced due to environmental issues.
- **4.6 Owner and Occupant Information** Neither the owner nor the occupant have specialized knowledge or experience that is material to recognized environmental conditions in connection with the subject site.
- **4.7 Reason For Performing Phase I** The Phase I has been conducted as part of due diligence prior to the acquisition of this property by the Provincetown Housing Authority.

#### **5.0 RECORDS REVIEW**

BG conducted a review of the following Federal, State and local sources, as per Section 7.2.1 and 7.2.2 of the Standard by reviewing an EDR Report for the site area. That report identified the following:

## **5.1 Standard Environmental Record Sources**

	Minimum Search Distance	<u>NO</u>	<u>YES</u>
NPL ("Superfund") Sites	1.0 miles	X	
Federal CERCLIS sites	.5 miles		X
RCRA TSD sites	1.0 miles	X	
RCRA Generators	site or adjoining properties		X
ERNS List	site	X	
Active Remediation sites	.5 miles	X	
Landfill/Solid Waste sites	.5 miles	X	
State Listed spills	site or adjoining properties	X	
Active Registered AST/UST List	site or adjoining properties	X	

FEDERAL CERCLIS SITES – The Provincetown landfill is located to the northwest of the subject site. While it is a CERCLIS site it is not a listed waste site, and therefore BEC is not of the opinion that it represents a material environmental risk to the subject site.

RCRA Generator – The Upper Cape Health site is located across Harry Kemp Way to the south of the site. It is a Very Small Quantity Generator with no record of non-compliance. BEC is not of the opinion that it represents a material environmental risk to the subject site.

#### 5.2 Additional Environmental Record Sources

BG did not identify any additional environmental resources during our research and were not made aware of any prior environmental assessments performed at the site by the client. Therefore, BG did not review any additional environmental record sources, other than those referenced in this report

## **5.3 Physical Setting Source Review**

As per Section 7.2.3 the following sources were reviewed for information pertaining to the physical setting of the source.

- Provincetown, MA USGS Quadrangle Maps
- 5.3.1 Geologic Characteristics Geologically, the site is located on the eastern end of Cape Cod. The Cape is a terminal morain that has been reworked by wave and tidal action. The area soils consist of interbedded sand and gravel. Depth to bedrock was not determined. Depth to groundwater is less than 20' below the surface.
- 5.3.2 Topography The topography of the general area is flat, following the contour of the surrounding areas.
- 5.3.3 Wetlands BG is not aware of any delineated wetlands on the subject site.

#### **5.4 Historical Use Information: Site**

As per Section 7.3.1 of the Standard, the following Standard Historical Sources were reviewed.

<u>Aerial Photos:</u> BG reviewed aerial photos for the site from 1938, 1971, 1995, 2008 and 2016. The subject site area appears undeveloped in every set of photos.

Assessor's Card: The assessor's cards for the subject site do not list a building.

<u>Street Directories</u>: No Street Directories were found in the Provincetown Public Library.

According to Aerial Photos, and Assessor's Card, BEC is of the opinion that the subject site has been undeveloped land since at least the 1900s.

## 5.5 Historical Use Information: Abutting Sites

The surrounding area appears to have been developed with a mix of single family, multifamily and institutional uses over the past 50 years. The site is abutted to the north by conservation land, to the east by single residential use, to the west by the Provincetown Housing Authority, and to the south by the Upper Cape Health facility. Prior to development, all of these sites were undeveloped woodland.

## **6.0 SITE RECONNAISSANCE**

On February 14, 2020 staff of BG visited the site and conducted a walkover inspection of the site. Photographs are included in the Appendices of this report.

## **Site Reconnaissance Checklist**

	Yes	<u>No</u>	<u>Notes</u>
UST's or AST's		X	
Chemicals and/or Raw Materials		X	
Floor Drains		X	
Suspect Odors		X	
Pools of Liquid		X	
Drums		X	
Unidentified Product Containers		X	
PCB's		X	
Drains and Sumps		X	
Pits, Ponds or Lagoons		X	
Stained Soil or Pavement		X	
Stressed Vegetation		X	
Onsite Solid Waste Disposal		X	
Onsite Wastewater Disposal		X	
Wells		X	
Septic System		X	

#### **6.1 Methodology and Limiting Conditions**

The site reconnaissance consisted of visual and/or physical observations of the property and improvements as well as adjoining sites, as viewed from the property and surrounding area, based on visual observations made during the trip to and from the property. Unimproved portions of the property (if any) were observed from along the perimeter of the property. Exteriors were observed from the ground, unless described otherwise.

## **6.2 General Site Setting**

The subject site is located in an area of Provincetown that is a mixture of u developed woodland, single family residential uses, multifamily residential uses, and institutional land uses.

#### **6.3 Exterior Observations**

The Site Reconnaissance of the subject parcels was conducted according to ASTM Standard E-2247-08 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process for Forestland or Rural Property1. This practice varies from ASTM 1527-13 only in the manner in which the reconnaissance of historically undeveloped forest land or rural land is conducted.

In Practice ASTM E-2247-08 a historically undeveloped forestland is defined as a **historically undeveloped or unmanaged forestland** if it "contains no relevant manmade changes and is of such size or of such a nature that visible and physical observance of the property as contemplated in Section 9 of this practice is not capable of being accomplished within reasonable time and cost constraints, will yield little information relevant to the property, or will generate extraordinary amounts of irrelevant information." BG is of the opinion that the subject parcels meet this definition.

Practice ASTM E-2247-08 requires that the Site Reconnaissance to be conducted so that "the property shall be visually and/or physically observed to include areas generally accessible by foot, vehicle, or reasonably accessible by aircraft, to the extent not obstructed by bodies of water, adjacent buildings, or other obstacles. The periphery of the property shall be visually and/or physically observed where accessible, as well as the periphery of all structures on the property, and the property should be viewed from all adjacent public thoroughfares. If roads or paths are observed on the property, the use of the road or path shall be identified and evaluated to determine whether it was likely to have been used as an avenue for disposal of solid waste, hazardous substances, or petroleum products."

To satisfy these requirements, during our site visit of February 14, 2020, BG observed the periphery of the subject site along Harry Kemp Way, and visually observed the interior of the parcel by walking north-south traverses across the property. Additionally, the sites use was assessed using historical aerial photos, as allowed by Practice ASTM E-2247-08.

No evidence of prior development was observed anywhere on the subject site.

#### **6.4 Interior Observations**

There were no interior observations made during this assessment as no structures exist at the subject site.

#### 7.0 INTERVIEWS

- **7.1 Interviews with Owner** It was not possible to conduct an interview with an owner during the schedule of this assessment. While BEC recognizes that this represents a data gap we are of the opinion that the balance of the information available on the site's historical uses was adequate to satisfy the report requirements.
- **7.2 Interviews with Site Manager** There is no site manager in this case.
- **7.3** Interviews with Occupants There are no occupants in this case.
- **7.4 Interviews with Local Government Officials** The Provincetown Fire Department was contacted for this assessment. There was no information for this site in their files.
- **7.5** Interview with Others There are no other interviews in this case.

## **8.0 FINDINGS**

+ The subject site has been an undeveloped piece of land since at least the 1900s.

## **9.0 OPINION**

In the opinion of Brackett Environmental Consultants there was no evidence developed during this assessment to indicate the presence of Current, Historical, Controlled or De Minimis Recognized Environmental Conditions at the subject site at the 46 Harry Kemp Way site, Provincetown, MA.

## **10.0 CONCLUSIONS**

Based on the information reviewed for this assessment BG has the following conclusion:

It is the conclusion of BG that the research conducted during this assessment has not revealed any significant evidence of current, historical, controlled or de minimis recognized environmental conditions in connection with the site at the 46 Harry Kemp Way site, Provincetown MA.

The risk of contamination at the site is so minimal that no further investigation is warranted at this time.

As stated above, the objective of a Phase I Environmental Site Assessment, under the scope and limitations of the ASTM Practice E1527-13, is not to eliminate uncertainty regarding the potential for recognized environmental conditions at a property, but to reduce them by conducting appropriate inquiry. In the opinion of BEC appropriate inquiry has been conducted.

<u>11.0 DEVIATIONS</u> – BG is of the opinion that there were no material deviations from the standard and practice prescribed in ASTM 1527-13.

<u>**12.0 ADDITIONAL SERVICES**</u> – No additional services beyond those prescribed by ASTM 1527-13 were performed.

**13.0 REFERENCES** – References are cited in the body of the report.

## 14.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I declare to the best of my professional knowledge and belief that I meet the definition of an Environmental Professional as defined in section 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and expertise to assess a property of the nature, history and setting of the subject property. I have developed and performed this Phase I Environmental Site Assessment in conformance with the standards and practices set forth in ASTM 1527-13.

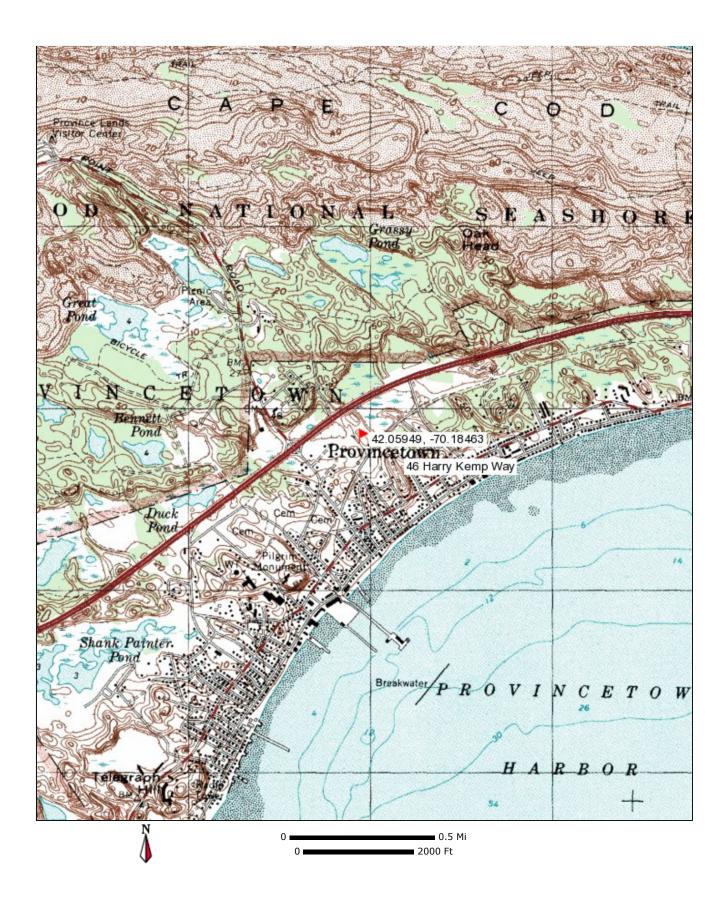

Steven L. Brackett, P.G.	
Senior Geologist	

## 15.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL

Jonathan Brackett meets the definition of an Environmental Professional as defined in section 312.10 of 40 CFR 312. He has conducted Phase I Environmental Site Assessments and Transaction Screens in New Hampshire, Vermont and Massachusetts for the last 10 years.

#### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/30/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

### Federal RCRA generators list

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FUDS Detail as of Jan 2015:

Description:

History:

Fiscal Year: 2013

Federal Facility ID: MA9799F9196
RAB: Not reported
NPL Status: Not Listed

The former U.S. Naval Mine Test Facility was located at the comer of Bradford and Hancock Streets (291 Bradford Street) in Provincetown, Massachusetts. The United States acquired approximately 0.17 acre fee on 13 June 1945 by purchase. The Navy used the Naval Mine Testing Facility to store, test and distribute mines. No structures were built by the Navy at the site. At the time the Navy acquired the land, a two-story wood frame building was situated upon the land and occupies most of the lot. It is not known whether the site was under the control of anyone other than DOD during the period of DOD use. The Navy reported 0.17 acre fee excess to the War Assets Administration (WAA) prior to November 1948. The WAA conveyed approximately 0.17 acre fee to the Town of Provincetown on 22 November 1948. The deed reserved to the United States all uranium, thorium, and other materials determined to be essential to the production of fissionable material, together with the right to mine and remove the same. The deed required the town for twenty five years to continuously use the premises for a technical or trade school. For a period of twenty-five years, the town was required to file semi-annual reports with the WAA. The town could not to dispose of the premises for twenty-five years without written approval of the WAA. In the event of a breach of any condition by the town, all right, title, and interest to the premises would revert to the United States at its option. The town could secure abrogation of the conditions by making payment to the United States and obtaining approval from the WAA. The deed contained a recapture clause in the event of a national emergency. The deed did not contain a restoration provision. Sometime during the mid 1970's the site was conveyed by the town to a private commercial interest. The site is currently owned by

Dwyer Family Realty Trust and is curren

Although available military information regarding the military's use of the facility is limited, it is assumed that the Navy used the site

to store, test and distribute mines.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

### Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

#### Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

#### Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

### Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation
and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database
includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste
as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate
less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Next Scheduled EDR Contact: 04/06/2020 Data Release Frequency: Varies

### State and tribal Brownfields sites

BROWNFIELDS: Completed Brownfields Covenants Listing

Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

Date of Government Version: 04/05/2017 Date Data Arrived at EDR: 08/03/2017 Date Made Active in Reports: 10/10/2017

## ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Next Scheduled EDR Contact: 05/18/2020 Data Release Frequency: Quarterly

#### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

#### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

#### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

### **EDR Exclusive Records**

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

### **Nursing Homes**

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### **Public Schools**

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: MassDEP Telephone: 617-292-5907

Areas of Critical Environmental Concern Datalayer: The Areas of Critical Environmental Concern (ACEC) datalayer shows the location of areas that have been designated ACECs by the Secretary of Environmental Affairs. ACEC designation requires greater environmental review of certain kinds of proposed development under state jurisdiction within the ACEC boundaries. The ACEC Program is administered by the Department of Environmental Management (DEM) on behalf of the Secretary of Environmental Affairs. The Massachusetts Coastal Zone Management (MCZM) Office managed the original Coastal ACEC Program from 1978 to 1993, and continues to play a key role in monitoring coastal ACECs. Procedures for ACEC designation and the general policies governing the effects of designation are contained in the ACEC regulations (301 CMR 12.00). The ACEC datalayer has been compiled by MCZM and DEM and includes both coastal and inland areas.

# BRACKETT ENVIRONMENTAL CONSULTING

BRACKETT ENVIRONMENTAL CONSULTING
STATEMENT OF QUALIFICATIONS
2019

### INTRODUCTION

Brackett Environmental Consulting is a consulting practice conducted by Jonathan Brackett with offices at 176 Drakeside Road Unit 301 in Hampton, NH. The practice consists primarily of environmental consulting to the private, public and institutional markets in New Hampshire, Vermont, Maine and Massachusetts.

References and Certificates of Insurance are available upon request. Brackett Environmental Consulting carries professional liability insurance and general liability insurance.

### AREAS OF PRACTICE

**Environmental Assessments** 

- Record Search with Risk Assessments
- Transactions Screens
- Phase I Environmental Assessments
- Phase II Environmental Assessments

### REPRESENTATIVE PROJECT EXPERIENCE

**Environmental Assessments** – This service is conducted almost exclusively for banks as part of commercial lending due diligence.

Records Search with Risk Assessment – Since the US Small Business Administration revised their SOP for SBA 504 Loans in August of 2008 Jonathan Brackett has prepared over 100 Records Search with Risk Assessment report for various banking clients throughout New England. The majority of these reports have been conducted in eastern Massachusetts and in New Hampshire but have also included projects in Maine, Vermont and Rhode Island. In each case Brackett researched pertinent publically available Federal and State environmental files, conducted historical research through online databases and phone interviews, and expressed an opinion as to whether the site represented a high or low environmental risk.

BEC has customized these reports to be used as preliminary environmental screening tools for non-SBA loans as well.

<u>Phase I Environmental Assessments</u> - Jonathan Brackett conducted approximately 45 AAI Compliant Phase I ESA's per year between 2008 and 2018 at Brackett Geosciences ("BG"). A description of a representative project follows:

96 Dunbar St. (former Perkins Machine building), Keene, NH - In 2003 an existing NH client, in anticipation of purchasing the site, asked BG to conduct a Phase I ESA of this former machine shop building located in a portion of Keene's that has historically been characterized by industrial land uses. In addition to the common historical sources such as fire insurance maps and street directories, reviewed files for abutting sites. While groundwater data from wells abutting the subject site did not indicate groundwater contamination moving off the subject site, given its history as a machine shop a Phase II was recommended.

<u>Phase II Environmental Assessments</u> – The objective of a Phase II ESA is to collect soil and/or groundwater samples to determine conclusively if, in fact, releases of hazardous chemicals or petroleum has occurred at a given site. In the case of the 96 Dunbar St. site four monitoring wells were installed to evaluate an underground storage tank and floor drains at the site. Soil and groundwater sampling identified petroleum contamination from an above ground storage tank, but no solvent contamination. Once the degree and extent of contamination was determined BEC's client was able to secure financing. The site is now being remediated with the support of the NH Petroleum Reimbursement Funds and redevelopment of the site into a mixed commercial/residential building has begun.

# RESUME OF JONATHAN M. BRACKETT

DATE OF BIRTH: November 27, 1980

PLACE OF BIRTH: New Orleans, LA

UNDERGRADUATE DEGREE: BS Manufacturing Engineering and Safety, Keene

State College, 2004

### PROFESSIONAL EXPERIENCE:

In the winter of 2007 Jonathan Brackett began practicing consulting in the field of environmental assessment and remediation. This practice has continued to the present time. During this time Jonathan has conducted 100+ Phase I Environmental Site Assessments, and 100+ Transaction Screens. These have been conducted in New Hampshire, Vermont, Massachusetts and Maine.

2007- 2017: Environmental Consultant; Brackett Geosciences

2017 - Present: Environmental Consultant; Brackett Environmental Consulting

PROFESSIONAL ASSOCIATIONS

Member, Society of Manufacturing Engineers (SME)
